Plum  
Mirabelle

## ANIMALS

### SHELTERED

### FREE RANGE

Buffalos  
Cattle  
Sheeps  
Pigs

### WARNING :

Don't forget to shelter your goats at the end of September.

### - WARNING -

*"Account abuse is harmful for game fun"*

We want to remind you that SimAgri allows only one account per person.

Accounts are checked every day to avoid (present in all games unfortunately) cheating. If we find any rule breaking, the account is immediately de-activated (cf game rules "banning from SimAgri").

We want to remind you that cheating is detrimental to the whole SimAgri community it penalise not only the players but also the team in charge of the site as they spend time checking accounts instead of spending this time on game development and such.

### - NEW STUFF THIS MONTH -

- Relooking the game rules page interface.
- Green market development.
- Winter ration for meat breeds left in the meadows during the cold season.
- Optimising the future 3D map.
- Optimisation/modification/correction of several small elements.

### - NEW STUFF TO COME -

- Changes in the Game rules page.
- Developing the green market activity.
- Optimising the 3D map.
- Regional Agricultural Cooperatives (RACs) can now emit shares both at regional and national level.
- Optimisation/modification/correction of several small elements.

### - THE TEAM'S WORD -

-A long waited for change ! Farmers breeding meat cattle and sheep breeds can now let them in the meadows during the cold season. You just have to put some feeding racks in the meadow and bring "winter ration" as well. For milk breeds, you still have to bring them back in the barns though.

-This week the 3D map should be finalised and available pretty soon ! It will give you the opportunity to show your farm with a much better look.

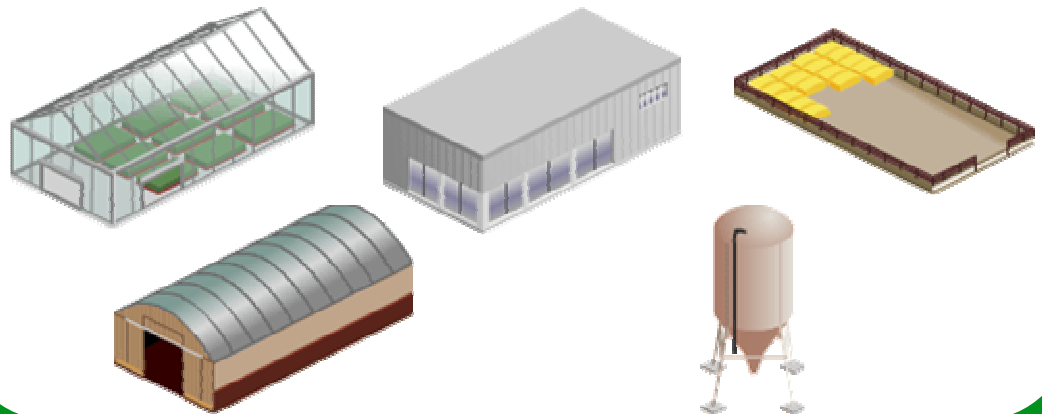

-RACs improvements are planned too. Whenever you'll choose to emit shares, you'll be given the choice of doing it at national level (current system) or at regional level. Thus, RACs are now given the choice of bringing benefit to their own region if they want to. Also you'll be able to sell your telescopic and a "pump" icon will be added for RACs with oil-works.

-Finally, as the player numbers are increasing, a new server (hardware) will be added to improve game quality during peak hours (lag and such). It is not a new country, don't go crazy thinking it's a new country, lol.

Good game to you all !

### - 3D MAP -

-In a few weeks, the 2D map will become a 3D map with new building designs. Here are a few of them :

### 🏆 - SIMAGRI CONTEST - 🏆

**Sunday 9th of November 2008** the lottery took place. The prize was a miniature at scale 1/32th, **GERME** (France 1 server) won it, congratulations to him. The next lottery drawing will take place **Sunday, the 23th of November 2008**. This time, the prizes will be a SimAgri T-shirt. Don't forget to sign up for the lottery and may be win a free SimPass ! Good luck to you all !!!
